Amazing feedback if something needs more attention 😊

(name of child) is thriving!

(name of child) has come on so well since joining St. Paul's. His confidence has grown, and I can see a massive improvement in his reading ability and his passion to read.

(name of child) has flourished at St Paul's and seems to be continually supported and encouraged.

Couldn't be happier

Educationally my son has come on leaps and bounds but emotionally and socially he has struggled a great deal

(Name of child) is very proud of his achievements since he has been in Fosse class. He appears to be well supported by his teachers and they respond well to the topics that he finds more challenging.

He loves and thrives on the variety of lessons and competitions offered each week in school and also for the recognition given for his achievements to, from the golden mile to accelerated reader and the 55 club.

Thank you

I agree

I feel my daughter could be supported a bit better. I know the school as a whole can only do so much but I do feel that more could be done quicker.

I think Academically my child does okay but I think he needs more support in class as he struggles with certain aspects of being in a classroom environment. He also needs support socially as he struggles with making and keeping friends but he struggles to communicate this so masks through the day.

My child has done well with 2 teachers however for 2 years he didn't as the teachers didn't support his learning style

My child has made great progress and staff are so accommodating for his needs

My son loves going into school, he looks forward to going in each morning. I feel school is very good at enriching the children's learning and each day is varied and fun whilst learning. My only thought is communication with his class teacher is sporadic, on dojo, I appreciate he's one of 30 in a class but a couple of times I have asked a question (not able to ask at the office) and had no reply which is frustrating.

Sadly my child is working years behind her peers and I'm concerned for her future

Seen a huge improvement in my child's progress since she moved to this school, and her desire to want to learn!

She does, and i asked if she gets extra support from the Ta and she does sometimes wen ive sent messages to her class teacher and TA i havenent got replys and I'm trying to reach out to them hem with advice and questions

She needs extra support and encouragement and class sizes are too big, so not possible

Since joining St Paul's my daughter has grown in confidence and her spelling and her handwriting look amazing - thank you

Some teachers have favourites, if your child isn't the 'favourite' then they won't do very well that year.

Unlike his previous school, my child is challenged which helps him to progress to his full potential.

We couldn't be happier with his progress. Academically improving all the time. He is good socially and has lots of friends.

we feel our son has come on so much in Year 5, thank you.

Whilst my child is not fond of school I feel there are a wealth of approaches to learning and lots of opportunities to engage pupils. E.g forest school
